

Editorial Note

Henning Hraban Ramm

Half of this volume is Taco's article on MetaPost paths, the third part of his in-depth tutorial series. Michal's article on multimedia in PDF was already published in the previous issue. Then there's Willi's talk on typescripts, my report for DANTE in German, a few photos – and that's it from the meeting. It was very nice again, but I had hoped for a few more contributions.

We also don't have any protocol from the members meeting, even if we changed our bylaws (shorter and only for the better, I can assure you), since our secretary could only take part remotely and nobody else volunteered. Pity! The current board consists of Pavneet Arora (Canada), Mojca Miklavc (Slovenia), Arthur Rosendahl (Sweden), Alan Braslau (USA), Taco Hoekwater (The Netherlands), Peter Münster (France) and Henning Hraban Ramm (Germany).

But we got some additional content: Hans van der Meer provided us with two of his articles for NTG's MAPS that would otherwise have gone unnoticed by most non-Dutch context group members.

Again a big 'thank you' to Clyde who helped with the copy editing and proofreading again – and of course to the developers and authors!

Enjoy!

Hraban
